Website Description: What is your organization?

Our project idea is about an Art gallery website. This website will allow you search arts through the years. in the main page there will be a search bar so the user will be able to reach a specific art piece by name, and next to it there will be some link tabs -> artists, galleries, events, styles, supplies, contact and history and also the main interface will contain trending artists and Arts.

the [artist] tab will open a new interface that will show artists based on different categories, when the user clicks on a specific artist their information and arts will show up

now if the user clicked the [galleries] tab a collection of different galleries will show up in a new interface with their locations and names in the table.

the [events] tab will open a new interface where the website will suggest art events around the world and to register for the art event, the user can fill out the form on the events page.

the [style] tab will show the arts based on different styles with an explanation of the style

if the user clicked the [supplies] tab an interface with different art supplies and their proper use will show up

the [contact] tab will allow the user to contact the gallery for any issues or problems they face

when the user clicks [history] tab an interface with the legendary artists and old school arts will show up

what is the content of the website?

POP ART

Pop Art is perhaps one of the most well-known and well-loved art styles throughout history and for good reason. It is, after all, a reimagination of sorts that “popped up” and took inspiration from mass or popular culture, particularly American consumerist culture, hence the name.

Vincent van Gogh

Van Gogh generally considered the greatest after Rembrandt, and one of the greatest of the Post-Impressionists. The striking colour, emphatic brushwork, and contoured forms of his work powerfully influenced the current of Expressionism in modern art. Van Gogh's art became astoundingly popular after his death, especially in the late 20th century, when his work sold for record-breaking sums at auctions around the world and was featured in blockbuster touring exhibitions.
